

Testing After Exposure

- Consider testing immediately upon learning of the exposure or potential exposure
- At least 5 days after the last date of exposure or potential exposure, regardless of vaccination status
- If the individual is not fully vaccinated and attending or working at school after an exposure or potential exposure, frequent testing (e.g., daily, every other day, at least twice within 5 days) from the date of the exposure or potential exposure (Day 0) through at least day 5 should be strongly considered and encouraged
- Exclude from school if a test is positive and/or exclude from school and test as soon as possible if symptoms develop
